FRACTION REVIEW - Vancouver Island University

Adding with Common Denominators To add fractions, if the denominators are the same, we simply add the numerators and keep the same denominators eg $\frac{4}{1} + \frac{4}{2} = 3$ Since the denominators are common, simply add the numerators. Notice that we must reduce the answer, if possible.

$\frac{12}{1} + \frac{12}{5} = \frac{12}{6} = 2 \frac{1}{2}$ Adding When One Denominator is a
